About

The State Road 78 project in Okeechobee County focuses on resurfacing and safety enhancements along a 1.691-mile stretch from Bridge No. 910094 over Lemkin Creek to US 98 (SR 15/US 441). The planned improvements include milling and resurfacing the roadway to provide a smoother driving surface, installing new pavement markings for improved lane visibility, and adding rumble strips to alert drivers when they drift from their lane. Additionally, traffic detection loops will be installed at the intersection of westbound SR 78 and SR 15 to enhance signal efficiency.
