

I-75 PD&E Study from Golden Gate Parkway to Corkscrew Road

Financial Project Number: 452544-1 July 2025

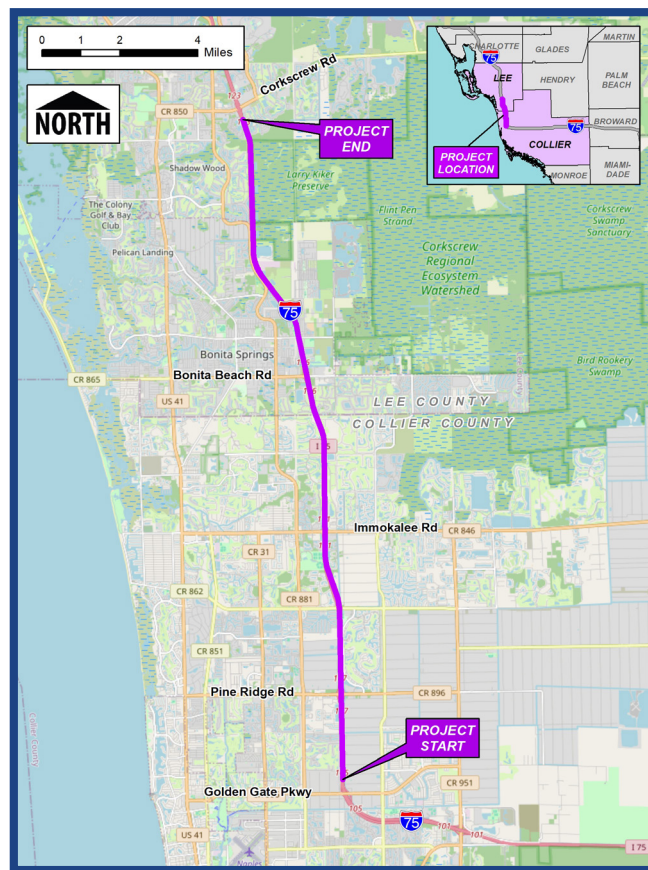

Public Hearing Scheduled

The Florida Department of Transportation (FDOT) invites you to a Public Hearing for the Interstate 75 Project Development & Environment (PD&E) Study from Golden Gate Parkway to Corkscrew Road. This project is a part of the Moving Florida Forward Infrastructure Initiative. **Two options are available for the hearing. It is only necessary to attend one event. Please note that multiple comments from individual attendees will only be counted once in the record.** This hearing is being conducted to present the preferred alternative and all analysis to date, as well as to give interested persons an opportunity to express their views.

The purpose of this project is to increase capacity, improve traffic operations, and enhance safety along the mainline of I-75 between Golden Gate Parkway and Corkscrew Road within Collier and Lee Counties. This project includes widening I-75, with no improvements to the interchanges, except for ramp modifications. Construction is anticipated to begin in 2027.

Noise Analysis

As part of this study, a comprehensive noise analysis is being conducted to assess current and future noise levels. The results of the analysis will be included in the project documents on display. There will also be a copy at the in-person hearing and available on the project website. Feedback is invited on these documents during the public hearing comment period. For information and questions specifically regarding the noise evaluation process, please visit: <https://www.swflinterstates.com/understanding-traffic-noise/>.

Choose one option to participate in the Public Hearing
